Doch welche Ausstattung wird dafür benötigt? Was sind die Voraussetzungen für eine gelungene Aufnahme? Warum sieht

ein Gebäude auf einem Foto ganz anders aus als in der Realität? Welche Methoden gibt es, die eigenen Aufnahmen zu verbessern? Welchen Einfluss hat die digitale Nachbearbeitung und welche Möglichkeiten eröffnen sich damit? Die Antworten gibt dieses Buch. Das erste Kapitel hilft bei der Zusammenstellung einer den individuellen Bedürfnissen angepassten Ausrüstung für die Architekturfotografie. Das zweite Kapitel setzt sich mit den gestalterischen Aspekten der Architekturfotografie im Innen- und Außenraum auseinander: Bei der Aufnahme haben Faktoren wie Standort, Bildkomposition oder Aufnahmeparameter einen entscheidenden Einfluss, denn je nach Vorgehen kann ein und dasselbe Gebäude auf ganz unterschiedliche Weise dargestellt werden. Im letzten Kapitel werden unterschiedliche Nachbearbeitungstechniken beim digitalen Workflow mit Bildbearbeitungsprogrammen wie Adobe Photoshop Schritt für Schritt erläutert. In der 4., überarbeiteten Auflage dieses erfolgreichen Buchs wurden – anhand zahlreicher neuer Bildbeispiele – die technischen Aspekte der Architekturfotografie den neuesten Entwicklungen angepasst. Weitere neue Kapitel befassen sich mit der Landschaftsarchitekturfotografie, der Architekturfotografie mit Drohnen sowie speziellen Eingabegeräten, die den Workflow in der Architekturfotografie stark beschleunigen können. Ein besonderes Augenmerk wurde außerdem auf das Arbeiten mit Graufiltern und verwischten Objekten sowie auf den kreativen Einsatz von Mehrfachaufnahmen gelegt. Dieses Buch bietet einen umfassenden Einblick in die Welt der Architekturfotografie, die für den Einsteiger als auch für den erfahrenen Fotografen gänzlich neue Perspektiven eröffnet, und regt den Leser durch die anschauliche Vermittlung von fachlichem und praktischem Wissen an, die Vielfalt der Architekturfotografie selbst zu erkunden.

An explosive debut novel! New York cop Joe Krueger is about to arrest a notorious drug pusher when his life changes forever. He witnesses a bomb tear through one of the city's biggest Jewish museums, leaving dozens dead. In the aftermath, the case takes an even more horrific turn: footage from the scene suggests that the bomber is Joe's own grandfather, infamous Nazi General Wolfgang Kruger, who died 70 years ago. With time running out until the next attack, Joe Krueger is forced to confront his family's monstrous past. Piecing the clues together, he discovers that his grandfather had been ordered to recover the True Cross for the Third Reich, and that modern-day neo-Nazis are racing to complete his mission. Armed with little more than a burning desire to expose this plot, Joe travels across Europe and the Holy Land fighting to stop these men and their plan to tip the globe into another world war.

AI researchers have been focusing on developing and employing strong methods that are capable of solving complex real-life problems. The 18th International Conference on Industrial & Engineering Applications of Artificial Intelligence & Expert Systems (IEA/AIE 2005) held in Bari, Italy presented such work performed by many scientists worldwide. The Program Committee selected long papers from contributions presenting more complete work and posters from those reporting ongoing research. The Committee enforced the rule that only original and unpublished work could be considered for inclusion in these proceedings. The Program Committee selected 116 contributions from the 271 submitted papers which cover the following topics: artificial systems, search engines, intelligent interfaces, knowledge discovery, knowledge-based technologies, natural language processing, machine learning applications, reasoning technologies, uncertainty management, applied data mining, and technologies for knowledge management. The contributions oriented to the technological aspects of AI and the quality of the papers are witness to a research activity clearly aimed at consolidating the theoretical results that have already been achieved. The conference program also included two invited lectures, by Katharina Morik and Roberto Pieraccini. Many people contributed in different ways to the success of the conference and to this volume. The authors who continue to show their enthusiastic interest in applied intelligence research are a very important part of our success. We highly appreciate the contribution of the members of the Program Committee, as well as others who reviewed all the submitted papers with efficiency and dedication.
