Gender, Masculinities and Lifelong Learning reflects on current debates and discourses around gender and education, in which some academics, practitioners and policy-makers have referred to a crisis of masculinity. This book explores questions such as: Are men under-represented in education? Are women outstripping men in terms of achievement? What evidence supports the view that men are becoming educationally disadvantaged? Drawing on research from a number of countries, including the UK, Australia, New Zealand and Canada, the contributors' discuss a range of issues which intersect with gender to impact on education, including structural factors such as class, ethnicity and age as well as colonisation and migration. The book provides evidence and argument to illuminate contemporary debates about the involvement of men and women in education, including: The impact of colonisation on the gendering of education and lifelong learning International surveys on men, women and educational participation Gender, masculinities and migrants' learning experiences Boys-only

classes as a response to 'the problem of underachieving boys' Men's perspectives on learning to become parents Community learning, gender and public policy Older men's perspectives on (re-)entering post-compulsory education The book goes on to suggest the implications for practice, research and policy. Importantly, it critically addresses some of the taken-for-granted beliefs about men and their engagement in lifelong learning, presenting new evidence to demonstrate the complexity of gender and education today. With these complexities in mind, the authors provide a framework for developing further understanding of the issues involved with gender and lifelong learning. Gender, Masculinities and Lifelong Learning will be of interest to any practitioner open to fresh ideas and approaches in teaching and programming connected with gender and education. Written by experts in the field of fire safety Complete coverage that goes beyond the syllabus content making it a useful resource after study Illustrated throughout to enhance understanding Across government bodies, from local to federal, legislative responses to mass gun violence in the new millennium have varied greatly. Lack of communication or collaboration between government officials forestalls the implementation of practiced strategy. In an effort to encourage widespread solutions, this collection of resources outlines the state of gun legislation in the 21st century and provides strategies that have been implemented across the U.S. Combining a wide range of perspectives, this book is divided into three parts that each tackle a unique but essential facet of gun legislation in the U.S. The first section features essays from field experts that detail the facts and culture of modern gun ownership. The second section features critical essays that outline the challenges and solutions surrounding guns and public safety. This section also includes, in their entirety, relevant documents from the U.S. Justice Department

and the Bureau of Alcohol, Tobacco and Firearms. Lastly, the third section provides multiple forecasts for the future of gun culture and politics. With the goal of connecting government workers of all ranks, this volume extensively details the many new gun safety regulations that have been enacted across the United States. Leisure Studies, including works on young people and leisure, the family, and political influence on the leisure industry. The concept of cross-cultural perspectives in research in food is important in general and particularly so in relation to human perception in food and health. Food concepts are very different across different jurisdictions. Different markets and cultures have varying perspectives on what is considered a palatable, acceptable, or useful food or food product; in simple terms, one size does not fit all in the majority of cases. Specific markets thus need targeted food design, to be successful from a myriad of perspectives. In this Special Issue anthology "Food, Health and Safety in Cross-Cultural Consumer Contexts", we bring together articles that show the wide range of studies from fundamental to market applicability currently in focus in sensory and consumer science in food, health, and safety cross-cultural contexts. From the included perspectives, it is abundantly clear that there is a need for much knowledge related to future food design linked to cross-cultural contexts and that this will continue to be critical to the success of food transfer in global food markets. As brilliant as he was, Vijay Patel – a young immigrant student from a Mumbai slum – could never have imagined the influence that he and

his children would have on the future of the United States and the world. Van Fleisher's FINAL Trilogy recounts that influence in three unique sci-fi thrillers: FINAL NOTICE ... FINAL ACT ... and FINAL CHANCE. Set in the not-so-distant future, the novels are laced with political satire, dark humor, and a dash of romance. And despite their sci-fi premise, they provide an unmistakably realistic reflection of modern society. In the fast-paced sequel, FINAL ACT, Fleisher weaves a plot that is again simultaneously realistic and surrealistic. Set in a chaotic political climate and gun-crazy culture, it once again features the "only slightly" sci-fi watch – the VT2. But while FINAL NOTICE evokes the question: "What would you do if you knew – for certain – that you had a couple of weeks to live?" ... FINAL ACT asks: "What might others do if they knew that you only had a couple of weeks to live?" And when those "others" include Bratva (the Russian Mafia) and the SVR (formerly the KGB), you have a page-turner that turns "what if" into "what is." Completing the trilogy, FINAL CHANCE may be science fiction, but it reads like a history of the future ... finding Vijay Patel in a world struggling to survive. By 2046, climate change has reached a tipping point. After decades of pandemics, increasing devastation by hurricanes and tornados, rising seas and burning forests, freezing winters, and unbearable summers, the "moment of truth" comes as an unprecedented heatwave kills over half a Saudi city. The air was just too hot to

breathe. The Final Trilogy, out now in eBook and soon, audible versions. So hold on for a thrilling ride!
